Guidance for Leadership in Sustainable Purchasing v2.0: Process Overview

In this cycle, we’re going to develop a strategy for managing the sustainability of our fuel purchasing. We’ll call it our “Fuel Strategy.”

What fuels are we buying for what purposes? Which fuels have the biggest impacts? Why?

We’ve identified and planned four projects that collectively can cut our fuel impacts by 20% and save $1 million.

START

Are we getting the expected outcomes? Time to update our objectives and our Plan?

Boss, we’d like you to review and approve the plan for our Fuel Strategy.

Green light. Everyone knows what they need to do according to the Plan.
